## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-16, 18-20, are considered allowable since when reading the claims in light of the specification none of the references of record alone or in combination disclose or suggest the combinations of limitations specified in the independent claims. As to claims 1-9, the prior art of record does not teach wherein said determining a coarse alignment offset comprises forming a data field from two adjacent measured symbols having a phase difference, greater than the predetermined threshold, a measured symbol immediately preceding the two adjacent measured symbols, and a measured symbol immediately following the two adjacent measured symbols. As to claims 10-15, the prior art of record does not teach wherein as part of determining the offset, the executable constructions configure the processor to: establish a data field from two adjacent symbols having a phase difference, greater than the predetermined threshold, an immediately preceding symbol, and an immediately following symbol.

As to claims 16, 18-20, the prior art of record does not teach wherein to determine the offset the remote transceiver is configured to measure pilot signal changes between adjacent unsynchronized symbols, and after identifying two adjacent

symbols having a pilot signal changes that exceeds a predetermined threshold, the remote transceiver is configured to search, within a larger region containing the identified symbols, for a two-symbol window position that maximizes a pilot signal change between the two symbols defined by the window. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
